PICTURE WORK OF ART

Handcarved Painting of Artist Rogers Is Being Donated.

Joseph Rogers, a Castle Gate young man, has an exhibition in the windows of The Sun a wood carving of much merit after the painting of *Orferman, The War Orphan*, to be disposed of for the benefit of the Red Cross Fund. The picture is a work of art, being handcarved from white pine wood two inches thick. This part of the work required nine days to complete. The paint is the best that is obtainable and was imported from France. Applications of paint were made every seven days, it taking that time for each coat to dry.

Artist Rogers has thus devoted considerable time to a most worthy cause, he having donated his work to the Red Cross of Castle Gate. The money derived from the sale of the picture goes to this fund. The picture will be on exhibition until tomorrow (Saturday) afternoon, when it will be returned to the coal camp and there disposed of.

The picture will make a handsome present to wife, sister, mother or sweetheart from the lucky one winning it.

You Send the Order---We Do the Rest.

We're right here every day in the year ready to supply you with any and everything you need in the best and poorest family groceries in the markets.

When you plan your Christmas dinner, better see us—we can give you some valuable pointers, not only on articles to buy but attractive prices as well. If's your order we're after—never fear but we will fill it to your satisfaction.

We're everything to fill it with property. You send the order and we'll do the rest—and you'll be satisfied.

Guaranteed for twenty years and finished like the finest jewelry in 14x20 size, and two inch and three inch Circassian walnut in 14x20 size. 14x20 convex glass.

ern railroads in a resolution took this decisive action last Wednesday as a means of eliminating an enormous amount of shifting. The pool becomes effective immediately. By pooling coal carrying cars and using them interchangeably, the committee announcement states transportation efficiency will be greatly increased.

Lars Frandsen has taken a lease on the Jesus Knight coal mine about nine miles northeast of Price up Deadman's Canyon. He will start to work it next week, selling the product at Price and to those who may go to the property for it. He pays a royalty of fifty cents a ton. His lease is for a year.

Fred M. Abbott, special investigator of the state public utilities commission, was in Price Wednesday inquiring into the coal situation. It was his intention when he came here to order railroad shipments of coal to Price stopping, but is thought to have changed his mind after conferring with local dealers and consumers. He doubts whether, under all the conditions prevailing, the Millburn and other local properties can supply the trade locally.

Dr. H. A. Garfield, national fuel administrator, is authority for the statement that while the annual output of coal has been increased approximately fifty million tons, the increase in consumption caused by the war is a hundred million tons. An instance cited is that of the Bethlehem Steel company, which demands an increased coal supply of three million tons a year. The coal demands of public utility plants, particularly in the industrial sections, have increased a third.

Standard Coal company has recently made many important additions to its mine equipment, including a straightedge mining machine, two shaftwall mining machines and a haulage locomotive. Other equipment consists of a motor generator set. The Standard has just completed twenty-one brick dwellings for its employees. The addition of this new equipment will increase the productive capacity of the company's mine from fifteen hundred to two thousand tons of coal daily.

There was a slight decrease in the production of bituminous coal during the week ended November 24th. The total production of soft coal (including lignite and coal made into coke) is estimated at 11,260,000 net tons, an average per working day of 1,874,748 tons. This was 6.6 per cent less than the output during the preceding week. It is encouraging to note, however, that the week's production exceeded that of the week ending November 19th by 1.1 per cent. The bituminous production thus remains higher than at any time since early July.

Denver and Rio Grande cars hauling commercial coal during the week ending November 24th numbered 1533, but during the week ending December 1st they totaled 1428 or an increase of 5 per cent. A slight decrease is shown in cars hauling merchandise, but the increase in cars hauling ore was 15 per cent. It is shown that there was a decrease in cars hauling smelter products. The coal and coke proportion of all freight was 58.7 per cent during the week ending November 24th and 53.8 per cent during the week ending December 1st.

Spring Canyon Coal company, operating at Morris, has completed the installation of its big electric mine hoist, which will increase the capacity of its mine to five hundred tons per day. This hoist will haul sixty-two tons of coal a trip, and will make the trip in six minutes. During the winter the company will put in a surface tram connecting the portal of the main mine entry with the old tipple, as well as with the new tipple which will soon be built. The yard capacity at the tipple is also being enlarged. These improvements, when completed, will more than double the productive capacity of the mine.

The Independent Coal and Coke company recently sold its five hundred kilowatt steam turbine generator to Utah Power and Light company, plant being shipped to Montreal, Canada. The coal company is now receiving its electric power from the Utah. The coal company has recently purchased two shaftwall coalcutters, making eight of this type now to use in its mine. In addition, a coal shoveler has been installed. In the use of this machine a test run of four hours resulted in the handling of a hundred and forty-five tons of coal. By laying doubletracks, with the shovel on one of them and the mine cars on the other, it is believed the machine will handle two hundred and fifty tons in eight hours.

Liberty Fuel company up Spring Canyon has already expedited over a hundred and fifty thousand dollars in the equipment of its new coal enterprise. Under the direction of Contractor Sam C. Sherill the buildings and store at the mine are now about completed, and work is progressing on the tipple and surface tramway. The machinery for the mine and tipple is arriving and will be installed so that regular shipments can probably begin by the first of the year. At the present time the company is hauling about a hundred tons of coal daily by wagon from the mine to the railroad loading station. Frank N. Cameron, president and manager of the company, recently visited the mine and is much pleased with the progress made.

Carbon Producers East, WASHINGTON, D. C., Dec. 4.—Representing the coal producers of Utah, L. H. Curtis and Moroni Homer are here to endeavor to obtain from the national fuel administrator an adjustment of Utah coal price so that the producers may meet the competition of Wyoming mine owners.

Some two months ago, the Wyoming owners were granted permission to increase prices of lump and prepared sizes and a reduction was made in the price of screenings.

An effort will be made to secure such concessions as will put Utah mines on the same basis as to price as those in Wyoming.

Dr. J. J. Buswell, orthopedic specialist of Salt Lake City, will be at Hotel Mayor Friday, December 14th, all day. No charge for testing eyes. Patients, Mr. and Mrs. J. J. Weigmann, and Messrs. H. W. Crockett, J. A. Crockett, L. A. Leander, J. G. Calaway, H. R. Twiss, George A. Woodson and many others—Advt.

CASTLE GATE IS ACTIVE

Much Work Along Red Cross and Similar Lines Lately.

CASTLE GATE, Dec. 4.—This camp is doing its bit with a hearty willingness in every direction during these war times. Mrs. William Littlejohn has recently made with her own hands five wool sweaters, three pairs of socks and three pairs of mittens. It is stated here that this is more than any one person in Carbon county has contributed to their own work. The local Red Cross has forwarded for sending to France before Christmas sixty suits of pajamas, eleven pairs of hand-wristlets, an equal number of sweaters, sixteen pairs of wool socks, eleven pairs of mittens and three scarfs.

Castle Gate's Knights of Pythias Lodge has donated the use of its hall on Red Cross days for the children's use, while the young ladies of the town are doing work in connection as government. The Red Cross work room is at the quarters occupied by the local band. It is well equipped and everything most suitable for the willing women workers.

Mrs. Ross Hampton recently donated the local Red Cross ladies a beautiful handmade dining table cover. One hundred dollars was realized from its disposition.

Twenty-five Christmas boxes have now been made up here and forwarded for "the boys over there" and elsewhere.

The big Red Cross does Thanksgiving netting the promoters more than fifty dollars. Mrs. Gemmill won the first prize, a turkey, and Riley Hoff got away with a chicken. The prizes were given with dance tickets.

J. B. Thompson, general superintendent, is back on the job after an absence of practically two months at Zion with his family. He has not been really down sick, but considerably under the weather.

Dr. E. M. Neher went to the county seat today on business of a professional nature.

The mine is now working better than it has for a considerable time. The output is around seventeen hundred tons daily. Price is getting about seven cars a month from here.

Superintendent Littlejohn and J. A. Thorne were Tuesday visitors to the county seat.

EMERY COUNTY SOLDIER IS AMONG THE WOUNDED ONES

Ottawa, Ont., Dec. 6.—The following Americans are mentioned in today's Canadian casualty list:

- Killed in Action—H. Hardy, Cleveland, O., and W. T. Dyer, Bradwood, Ill.
- Missing—W. J. Halahoff, Hartline, Wash.
- Wounded—P. Romano, Emporia, Utah.
- Wounded and Missing—J. M. Haunster, Omaha, Neb.

UTAH OYSTERS SOON ON THE BILLS OF FARE AT COUNTRY

So far as salt content is concerned, water of Bear River Bay is suited to oyster propagation, according to analysis of a sample of water and sediment, made by State Chemist Herman Herms and submitted to H. H. Bidgood, state fish and game commissioner. It is found that the sample, taken at a point about in the middle of Bear River Bay and distant east from Promontory Point (approximately five miles), contains less than 2 per cent of salt—in fact, 1,882 per cent. This percentage varies to higher, making the average 4.7 per cent, which is ideal for oyster raising. Bidgood has sent the result of the analysis to Chief Nelson of the biological survey at Washington, D. C., asking for suggestions as to best methods to be observed preparatory to planting an oyster bed in the area named.

These things but to leave it to those men to give what information there may be to be given out. I am merely here looking on and learning."

Fist Coal Trains Out.

PROVO, Dec. 4.—The first trainload of coal forty cars, over the Utah railway came down from the mines Saturday, and was transferred to Salt Lake City over the Salt Lake Route. Two more trains came down yesterday and were diverted at the Provo yard to points of destination.

The coal is hauled at the mines and the trains switched onto tracks for different points at Provo. Two trains a week will go to McGill, Nev., or the smelter there.

J. E. Stevenson is at present in charge of the Provo terminal of the coal road as yard superintendent and master mechanician.

CARBON PRODUCERS EAST,

WASHINGTON, D. C., Dec. 4.—Representing the coal producers of Utah, L. H. Curtis and Moroni Homer are here to endeavor to obtain from the national fuel administrator an adjustment of Utah coal price so that the producers may meet the competition of Wyoming mine owners.

Some two months ago, the Wyoming owners were granted permission to increase prices of lump and prepared sizes and a reduction was made in the price of screenings.

An effort will be made to secure such concessions as will put Utah mines on the same basis as to price as those in Wyoming.

ANNOUNCEMENT

In assuming the ownership of the Elite Jewelry company at Price this week we find that the stock recently taken over is not commensurate with the requirements and demands of the people of Price or of the numerous surrounding towns, camps and communities, residents of which will be looking this way for their many wants in the jewelry line.

We have partially overcome this for the holiday trade by making selections of such goods as we could from traveling men coming along the past two or three weeks and by personal buying at Salt Lake City, so that we have a fairly good line for immediate Christmas needs, BUT NOT WHAT WE INTEND TO HAVE LATER ON.

We at the same time have merchandise arriving daily and solicit a share of the holiday trade. Wristlet watches for ladies and gentlemen are just now the popular thing, and we have them in many styles and prices. Cut glass, hand-painted china, Gillette razors and a general holiday line. Very many articles of merit suitable for holiday remembrances.

We have come among the people here to make our home, and trust by honorable methods in business to merit a share of the patronage of the buying public hereabouts. Our aim is to handle only the best lines of goods for which we know there is a demand. We make a specialty of watch repairing and similar work.

Reports indicate that the new winter wheat crop just planted is nearly one-fourth larger in area than that planted a year ago.

In the semi-arid sections poisoned bran bait for grasshoppers should be distributed in the late afternoon or early evening.

Nothing Nicer For Christmas

Women everywhere are insisting upon Maytag Electric Washers because a comparison of values they are satisfied only with the week in week out service guaranteed by the Maytag and that alone. You should judge all washing machines by the Maytag standard of design and construction because the important points to know about a washer are—how clean it will wash, what it will wash, and how long it will last. The Maytag Electric washes everything absolutely clean, whether it be a piece of dainty lace, a heavy blanket or a pair of overalls. It is sturdy built and is guaranteed for three years continuous service.

The Maytag is simple, safe and sanitary. Can be instantly attached to any electric light socket and makes washing as easy as turning the switch. All gears are on one side and are enclosed to insure absolute safety. The Maytag construction is cleanliness and sanitation—there are no cracks or crevices to harbor refuse. Another important and exclusive feature of the Maytag Electric is the extension legs—built of seamless steel tubing and making it possible to adjust the machine for any height. This is an especially desirable feature.

Washing by electricity is the easiest, quickest and most sanitary way—no heat, noise or trouble and—most important of all—very little expense. The Maytag Electric will do the entire week's wash for an average family in just a few minutes at a cost of about two cents for electricity. Whether you do your own washing or employ a laundress, the Maytag Electric Washer will save you money, time and trouble—it will save wear and tear on your clothes—it will bring you that great happiness and satisfaction which comes from perfect washing economically done.

Come to our place of business, South Ninth street, and allow us to show you one of these washers. In stock and on the road are many other articles appropriate to the house for Christmas gifts. Many things that are reasonable and at the right prices. A pleasure to show you through the big stock.
